

POWERBANK

WITH LIGHTNING PORT 10 000 mAh

FEATURES:

- Dual USB output gives you the ability to simultaneously charge two devices.
- The intelligent chip adjusts the parameters to the connected device and ensures optimal charging current.
- The double input allows you to charge the powerbank with a cable in two standards Lightning or microUSB. Use one standard cable for charging your phone and powerbank.
- Includes protection against overvoltage and overload of the circuit ensuring stable and safe operation, eliminating the risk of damage to the device being charged.

PRODUCT SPECIFICATION:

| | |
|---------------------|----------------|
| Capacity | 10000 mAh/3.7V |
| Battery type | Li-Polimer |
| Input (Lightning) | DC 5V/2A |
| Input (Micro) | DC 5V/2A |
| Output #1 (USB 2.0) | 5V/2.4A |
| Output #2 (USB 2.0) | 5V/2.4A |
